

The book was found

The Encyclopedia Of Serial Killers (Facts On File Crime Library)

Synopsis

Provides information on hundreds of serial murder cases - from early history. This book includes major serial killers, as well as many older cases that have been solved, such as the Green River Killer, or further investigated like Jack the Ripper and the Zodiac Killer. It covers entries and appendixes, which pair with more than 30 photographs.

Customer Reviews

This is a fascinating read for true crime buffs. The author's stated purpose is to "demystify, as far as possible, those predators in human form who have been with us since the dawn of history..." Serial killers at large are so frightening that they end up touching all of our lives--most especially in the United States, where 84% of all known serial killers have committed their crimes since 1980. I first became aware of this type of human predator when I was a student at the University of Michigan, and John Norman Collins was murdering coeds with pierced ears and long brown hair. California native Michael Newton has published 181 books since 1977, including 147 novels but he is best known for his true crime and reference works. I have to say that I assumed this author was British because of his concise, witty style and also for his tendency to critique other true crime authors who failed to get their facts straight, including the names of a serial killer's victims. One of his special peeves is the term 'spree killer,' and he also doesn't seem to think much of profilers. Most of the entries in this encyclopedia are concerned with the serial killers themselves, whether they acted alone, in twosomes, or in packs. One of the biggest surprises for me was the large number of serial

killers who are or were women. Something like 12% of all serial killers are female, and Hungarian women seem especially prone to this behavior, starting with Countess Erzsebet B'thory in the sixteenth century whose final body count was somewhere between 300 and 650 victims. In the early 1900s, Vera Renczi murdered 35 husbands, lovers, and a son and was arrested by the police only after they searched her basement and discovered 35 zinc coffins.
