I bought this book for my friend who has just been diagnosed with diabetes and for me to understand her situation. The book delivered what was promised and after reading, I had acquired a good amount of information about diabetes and how one can cope up with it. Every detail was useful but for my friend, the How to Prepare for Travel was the most useful part of the book for her because she likes to travel and she doesn't want to stop travelling.

I don't have diabetes but it runs in my family bloodline. I learned a great deal of information about taking steps to prevent getting diabetes. I would recommend this book to everyone because it is an

extremely important topic that we all have to stand up against. Diabetes can happen to anyone and the book helped me to see the effects and dangers of consuming all the wrong types of foods. The most vital book to read on diabetes!

My mom have type 2 diabetes and I always worry about her health as she isn't really the kind to eat healthy or check on calories or carbohydrates content for each food serving. Reading thorough this book actually help me by reminding her as to what to avoid or at the very least mention very simple lifestyle changes that she can do. I don't like to fully overwhelmed her but day by day I say bits and pieces of what I have learned in this book to her.
